### Profile

Hello,

I am a current student actively seeking professional experience. I am a proficient programmer with a strong interest in Full Stack Web Development. Additionally, I am pursuing a path in Data Analysis due to my aptitude for Mathematics and Economics.

### Experience/Projects

- \* **Sכוןify:** A mock cleaning service application designed to enhance business efficiency by facilitating rapid and reliable bookings.
- \* **Telegram Trading Bot:** A cryptocurrency trading bot that employs paper trading to simulate cryptocurrency perpetuals, eliminating risk and achieving lightning-fast execution. Users have the option to save their profits to CSV files for analysis.
- \* **Simple Static Website:** A static website that provides data compression services to users.

### Education

- \* **High School:** Grey High School, 2018-2020

\* **High School:** Kingswood College, 2021-2022

\* **University of South Africa (UNISA):** Bachelor of Science in Informatics, 2024-Present

## Skills
